as a classical language of the past that is of no special relevance in the contemporary world. Those who have been exposed to it in school often regard it as nothing more than a scoring subject and have little appreciation for the various dimensions of the language. The objective of this course is to give students a taste of Sanskrit as a living language by introducing them to its basic grammatical structures so that they can start understanding simple texts as well as allow them to use it in daily life. It also seeks to give them an understanding and appreciation of the beauty of the different aspects of this language from its sounds to its rich content so that they feel enthused enough to delve further into it.
