Topic - EFFECTS OF
SUPERSTITION ON STUDENTS
OF HIGHER EDUCATION

INTRODUCTION

The Superstitious nature of Pupils and those around them has been a significant factor in the failure of Students nevertheless cling other beliefs as a means of comprehending and living with the unknown. Even non-believers frequently fall prey to the complex network of Superstitions lack a Scientific basis. college Students commonly place their fate in fate's hands. despite all educational institutions efforts to advance knowledge and intellectual rigor. Numerous high school and college groups have Superstitious beliefs and their implications may occur at the social and domestic levels and create several health issues. Consequently Pupils with Superstitious beliefs about domestic social and health concerns typically fail.

• The failure of a Students impacts their knowledge and other abilities as a result failures create obstacles to Students Social and Economic Success.

of educational institutions and the advancement of economic development. However there is still disagreement regarding the significance of Superstitious beliefs when evaluating student failure. This study contributes to the body of knowledge since it evaluates Superstitious beliefs, there is less research in the existing literature on the role of Student's motivation as a mediator between Superstitious belief,

NEED OF THE STUDY

Students are a nation's greatest asset. The nation's development depends on the performance of the nation's future. Social reformers, Political entities, Economists, Players, Philosophers and Scientists. The nation's student. Nevertheless, it is conceivable the several pupils fall far behind or even fail every year. The failure of a single student is a substantial loss for a nation. Moreover education. Secondary Purpose is to provide regular income, is contingent on the student's performance while obtaining on education. Student Success depends

On on institutions ability to attract more Parents, extend the education System, and generate more revenue when students are confronted with failures is leaving or Performance during tests. They attend educational institutions expectations of achieving both the Primary goal of human capital Production and the Secondary Purpose of financial gains. The focus must be placed on the cause of student failure of lessen the frequency of the student failures the primary Purpose of this student failure it also seeks to examine the function of student motivation as a mediator between superstitious beliefs towards home troubles health issues and students failure.

LITERATURE REVIEW

The value of the students achievement extends to students educational institution and national growth. Students who avoid danger cannot obtain adequate social and professional information and practical skills. These students enhance the institutions

reputation and revenue, in addition it
 provides a nation with human capital.
 However superstitious beliefs about domestic,
 social and health difficulties result
 in poor student performance and failure.
 Relationships between superstitious beliefs
 towards home troubles, societal issues and
 student motivation and failure occupy a
 prominent place in the literature with the
 aid of both research. The current student
 study explores the relationship between
 superstitious beliefs towards domestic, social
 and health issues and student motivation
 and failure.

Students with superstitious beliefs over
 domestic matters such as not doing anything
 at a particular event or listening to a squabble
 time and effort learning. These kids perform
 poorly during the during the ordinary study
 and lack knowledge and concentration
 during examination the likelihood of
 their failure is more significant.
