

NAME OF THE PROJECT: EPXPOSURE VISIT
FOR DAIRY INDUSTRY (Star Milk Pvt. Ltd),
Tarakeswar, Hooghly, WB

Paper: CC12/ Industrial Microbiology

SESSION: 2023-24

DEPARTMENT: Microbiology

SEMESTER: 5

OBJECTIVE: The students shall get an insight into the working of an industry associated with the production of various important products of everyday use particularly fermented products. The students shall get an onsite exposure on the various downstream processes employed. Eventually they can get opening for internships, summer projects and the like. Also an industry – academia relationship could be built up through a slow but steady pace.

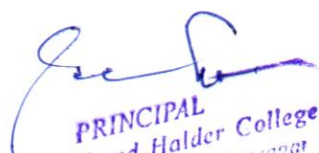

OUTCOME: Students had the opportunity to observe the different procedures undertaken by

South 24 Parganas, Dist-743377

the industry professionals to make consumable products of everyday use.

Generally some small scale pilot experiments related to industrial microbiology is undertaken as per the course curriculum. However such industry visits enable the students to avail the opportunity to know in details about the large scale production process.

In addition the students come to know the working module in an industrial set-up so that the experience can help them to develop mindset to take up career as industrial professionals.
