

NAME OF THE PROJECT: SURVEY FOR HPV VACCINATION

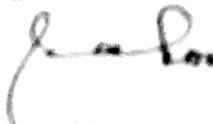

SESSION: 2022 - 23

DEPARTMENT: Microbiology

SEMESTER: 3

OBJECTIVE: To raise awareness for prevention of Cervical Cancer and promote HPV vaccination

OUTCOME: The students studying Virology in their course curriculum had the opportunity to get exposed to do a survey related to Cervical Cancer caused by Human papillomavirus (HPV) among the underprivileged class girls and women and hence raise awareness among the people

HPV SURVEY From Department of Microbiology,

Total Participants – 392

Total Groups – 5

Survey location –Joynagar Majilpur.

Convenor – Dr. Malini Basu(HOD, Microbiology Dept. of DCH College).

Patron – Dr. Satyabrata Sahoo (Principal, DCH College), Rinku Das (Chief Health Officer, Uttar Durgapur Suswasthya Kendra).

Date of survey – 10/10/2022

End of day we are successful to touch our small aim to spread the awareness of HPV Vaccines and Hp Virus also.

[Suspects found by Quetionaire checked by doctor and health workers.]

Suggested vaccine name – Cervavac, made in India.

Gardasil IX, made in abroad.

Suggested Medical Test – PAP Test.

The whole survey was directed by Dr. Monica Saha , Dr. Malini Basu

HISTORY OF HUMAN PAPILLOMAVIRUS AND CANCER:

Harold zur Hausen discovered the link between HPV & Cervical cancer in 1970s. He demonstrated that persistent HPV infected cervix had 95% chance of developing Cervical Cancer if it left untreated. 12 HPVs (16,18,31,33,35,39,45,51,52,56,58, &59 are mainly responsible for this cancer but two are most common(18 and 16).

The HPV Vaccine was invented in abroad, but our India is not behind. In september 2022 The Serum Institute Of India partnership with Indian Govt. launched The HPV Vaccine Carvavac.

The HPV Vaccine was invented in abroad, but our India is not behind. In september 2022 The Serum Institute Of India partnership with Indian Govt. launched The HPV Vaccine Carvavac.

VACCINE DOSES

9-14 YEARS= 2 DOSES (D1- 5 MONTH-D2)

14-45 YEARS=3 DOSES

(D1-2 MONTH-D2-6 MONTH-D3)

Conclusion:In conclusion it may be commented that our venture for social awareness was for the people from different socio-economic background; the success of which has added feathers of new experience to our student life while persuing the undergraduate course of Microbiology.

Initiative gives people a goal, and persistence in the goal, crossing paths, striving brings success. We all reach this goal together. Our small steps introduced us to practical experience.

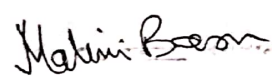

"IN THE BEGINNING, VACCINES ARE BEST

AND YEAR AFTER YEAR DO THE PAP TEST..."

■ Our slogan.

Get vaccinated, stay healthy, prevent cancer. If we can stop even one cancer today, this small success could turn into a cure for cancer in the future.
